

ICONMODERN

CUSTOM SPACE DIVIDERS

Creative freedom is often restricted with standard products. Our custom space dividers present an opportunity to not only separate space but to add unique designs and explore their multi-functional use.

Safely dividing space is an important part of the next generation of spaces. But safety shouldn't sacrifice creative expression and design. Our custom space dividers offer endless possibilities – from form, function, material, texture, shape and color.

Icon Modern has fabricated many custom space dividers and this document serves as a guide to the common types and options. This is by no means all-encompassing. Its purpose is to cover many of the common questions we receive about our most-requested dividers (while also including a ton of project photos for inspiration!).

If you have additional questions or are looking for a different type of space divider, reach out to us. We love new design challenges!

Covered in this product guide:

- Wood Slat Walls + Ceiling Elements
- Modular Steel Dividers
- Steel Frame + Infill Dividers

WOOD OPTIONS

CUSTOM SPACE DIVIDERS

WOOD SLAT WALLS + CEILING ELEMENTS

Patterns, warm tones and linear division of spaces are just a few advantages to wood space dividers. Lattices, dowels, slat walls and beam dividers/ pergolas are custom built to your specification. Varied sizes, lengths, species and finishes available.

ADDITIONAL INFORMATION

- Let us engineer your product using steel supports/mounting plates, concealed or decorative connections
- Common slat lengths up to 12’ long
- Infill panels can be customized to compliment the design of any project
- Value engineering assistance upon request

MODULAR STEEL OPTIONS

CUSTOM SPACE DIVIDERS

MODULAR STEEL

Our modular steel dividers can act not just as space dividers but as multi-functional elements in a space. Incorporate planter boxes to support biophilic design, offer collaborative tools such as whiteboards or add signage to reinforce your brand. They can be designed in any shape, size or color.

ADDITIONAL INFORMATION

- Large assemblies are typically fabricated in multiple sections to meet your spaces needs and freight elevator requirements
- Free-standing or fixed options available
- Lets us engineer your product using steel supports/mounting plates, concealed or decorative connections
- Add ons can be customized to compliment the design of any project
- Value engineering assistance upon request

STEEL FRAME + INFILL OPTIONS

CUSTOM SPACE DIVIDERS

STEEL FRAME + INFILL DIVIDERS

Our steel space dividers have many uses and styles. They are a budget-friendly way to re-purpose a space’s existing footprint. Metal infills can be utilized to house elements such as plants or signage. Unique laser cut patterns can be incorporated along with custom powdercoats to emphasize your client’s brand.

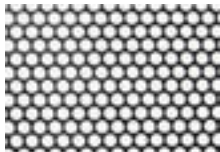

ADDITIONAL INFORMATION

- Various patterns and profiles available to include McNichols and Banker Wire products
- U-channel framing used to protect from sharp edges
- C-channel framing used to safely support glass, acrylic, markerboard and acoustic panels
- Value engineering assistance upon request
